TESTIMONIALS

"Applying for the program has been one of the best decisions I've ever made, I've gained so many skills & finished school with multiple job offers that will actually turn into a career. This program is the reason I went from living paycheque to paycheque to actually being able to save and invest my money. I will forever recommend this program to all women I know looking for a rewarding career."

"Thanks to this program, today I am working full-time as a machinist. I have learned so much, and have also been able to apply what I've learned through the program every day at work."

"I knew I always wanted to be in the trades, never a machinist, but here I am, a machinist. I finished school in December 2021 and was hired in January 2022. What a great experience and thank you WEST! "

"The program offered so many resources that helped in building my confidence. From resume building, employable skills, and hands on lessons to get you familiar with tasks in factories/shops. Some of the courses were a little challenging, but with the help of classmates and instructors who understand & care about you succeeding I was able to complete the program. This program has truly changed my life, and I believe it can help any woman who is looking for a career in the Skilled Trade."

"I came into this program knowing I will gain skills in the trades. What I didn't know I would receive, is an experience that has changed my perspective on everything and everyone. I'm so proud to say I'm going to be a successful machinist because of WEST and the wonderful opportunity I was given. "
